Education: Self Taught

Email: Josh.Uzzell@gmail.com

Direct: (202)-403-4494

Objective

Build interactive experiences that improve how businesses communicate value to users online.

Hard Skills

PHP Development	JQuery/Javascript/AJAX	Adobe CC
MySQL/SQL	Bootstrap/Zurb Foundation	Vector Illustration
Version Control with Github	Mobile Responsive Development	Photomanipulation
HTML5, CSS3, SASS	UX/UI Design	Layout Design

Web Developer

February 2016 - May 2017

Mission Media (Creative Agency) - Baltimore, Maryland

Hand coded front end experiences for online games, HTML emails, microsites, and content management systems.

- Built templates for Drupal, Wordpress, and Coldfusion sites from Photoshop (PSD) design files
- Architected and built web applications using Vanilla Javascript and HTML5 Canvas
- Hand coded mobile responsive HTML emails for Publicaster and Constant Contact

Graphic Designer

September 2015 - January 2016

Entertainment Cruises National Headquarters - Chicago, Illinois

Supported national sales & marketing teams in maximizing revenue for seasonal and themed cruises. Tools used included from Adobe Photoshop, Illustrator Indesign, and Acrobat Pro.

- Assisted the maintenance of brand consistency across 7 products in 8 U.S. cities
- Created layouts for printed promotions as well as brochures and menus
- Retouched photos and designed text lock-ups for digital banners and ads

Development Projects

Online Games for Dreamworks - <http://create.dreamworks.com/make>

Led the development of 3 Javascript based character building apps for Trolls, How to Train Your Dragon, and Dinotrux. Each app used HTML5 Canvas to create printable PDFs of 3D models, coloring book pages, and paper airplanes reflecting the users in game creation.

Drupal Templates for Everyman Theatre - <http://everymantheatre.org/>

Produced mobile responsive HTML templates with reusable components to help the client publish information regarding their calendar, and shows. This required coordinating with Drupal 7 developers to provide CSS for Drupal Views.

Digital Promotion Package for STX Becoming 68 - <https://www.stx.com/becoming-68>

Produced a series of HTML emails, digital banners, a landing page for the periodic release of videos and photography from the would be Netflix Original, Becoming 68.

Personal Projects

PHP Based Email Client for HTML Emails - <http://www.joshuauzzell.com/myhtml-email-app>

Developed a PHP based app for customizing the layout and content of mobile responsive emails. The app supports sending emails, saving drafts, inlining css, and outputting raw HTML. The emails use percentage based widths on tables and divs to produce responsive layouts.

Hand Coded E-commerce System - <http://www.joshuauzzell.com/cakewalk-app>

Created a CMS from scratch that simulates an online shopping experience and provides a framework for streamlining online store management. The CMS is PHP based and works with a normalized SQL database to manage customer info, products, and sales.
